

Oracle Scene Issue 20 - And finally column

Oracle OpenWorld

I had the pleasure of attending Oracle OpenWorld which took place from the 6th – 8th of September at the Excel Conference and Exhibition Centre near the London Docklands. The conference was well attended and the sessions I managed to go to were really good. I also got a chance to look at the DEMOgrounds which had some really interesting demonstrations of all the new products coming out. If you missed the conference you can download conference presentations and white papers from this URL

<http://www.cplan.com/oracle/sessioncatalog>

The sessions are organised according to the following focus areas: -

- Industries
- Line of Business
- Oracle Services
- Small and Midsize Enterprises
- Technology

E-Business Suite R11.5.10

In the last issued I discussed a possible release date for 11i10 and also highlighted the key features of this new release. Recently I came across some documentation on Metalink which I believe would be useful for those wanting to know about the new features in 11i10. To find the documentation, log on to the Metalink site, click on the **E-Business 11i** button then select **Release Content Documents, 'About' Documents and Features Summary Matrices** and choose to download **11.5.10 Release Content Documentation**.

The documentation pack that you will download contains information on the following modules: -

- Healthcare
- Advanced Planning
- Discrete Manufacturing
- Financials
- HRMS
- Intelligence
- Interaction
- Logistics
- Marketing and Sales
- Order Management
- Process Manufacturing
- Procurement
- Product Lifecycle Management
- Projects
- Service
- Student System
- Technical

About the Deputy Editor

Richard Byrom is a Principal Consultant with Thales Information Systems, an Oracle Partner located in Crawley, United Kingdom. Richard can be contacted at richard@richardbyrom.com or you can visit his web site to download Oracle training videos, white papers and presentations at <http://www.richardbyrom.com> He is also the founder <http://www.oracleappsblog.com>, a web log dedicated to recording the daily thoughts of Oracle Apps Consultants.
